1. The following is an examiner's statement of reasons for allowance: The claims have been allowed because claim 1 recites a dispenser having a container and a cover to fit over the opening of the container. The cover has a port through which items stored in the container can be dispensed.. There is a raised boss on the inside surface of the cover. There is a wheel rotatably mounted under the cover with at least three fins. The wheel and fins carry an item stored within the container. The rotating fins are aligned to contact and pass over the raised boss on the inside surface of the cover each time the wheel is rotated 360 degrees. The claimed invention is not taught nor suggested by any combination of the prior art.

2. Obermeier et al is cited showing in figure 2 a type of dispenser utilizing fins 6.
